

Key applications

- ✦ **Hospitality**
Front of house receipting, bar and kitchen order printing
- ✦ **Retail**
POS and mPOS receipt printing

Star SDKs

Simple integration and user-friendly operation is at the core of Star's product development, and the MCP31CI and MCP31CBI models offer the very latest driver and SDK support including StarXpand SDK for cross platform development.

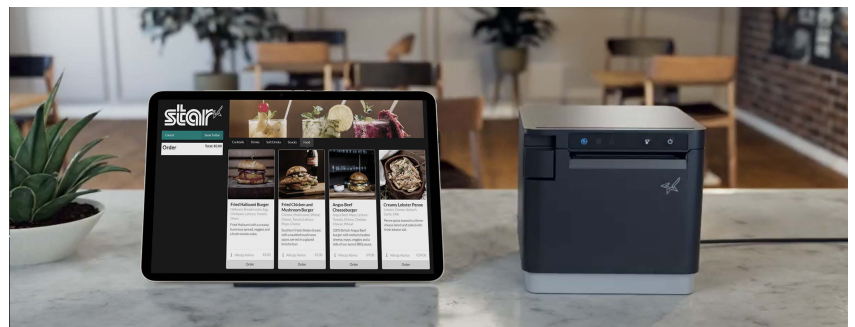

For initial set-up and operational use, Star's quick set-up utility and FAQs can be simply accessed via QR codes on the printer.

A favourite for tablet and Cloud POS applications, the popular mC-Print3 series from Star is synonymous with innovative design and seamless integration and connectivity. The latest MCP31CI and MCP31CBI models offer even better connectivity in the same sleek, stylish design.

Printing at up to 400mm per second, the MCP31CI and MCP31CBI models can handle high volume transactions with Star's print flat technology for flat receipts every time.

Star's USB-C interface (Power Delivery) supports iOS, Android and Windows devices for Tablet POS connectivity. The printers also offer Ethernet LAN, USB-A hub, integral Bluetooth connectivity (MCP31CBI) and optional WLAN. Star's next generation CloudPRNT technology is also included as standard for fast, reliable online ordering and omnichannel environments with support for the latest progressive web applications.

With an easy-to-clean IP22 rated splash proof, insect proof and dust proof design, the new models are ideal for hospitality environments for both front-of-house receipting or for bar or kitchen order printing. The front loading design also enables simple integration into kiosk and self-service environments.

Key features

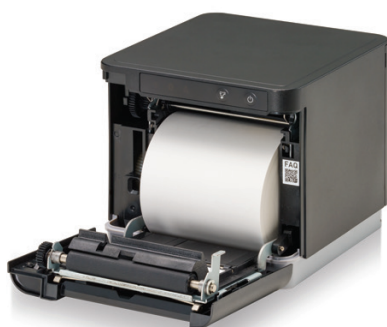

- Built for Tablet POS – popular mC-Print3 design with improved Tablet POS connectivity. USB-C Power Delivery for iOS, Android and Windows
- Fast 400mm/s print speed for high volume throughput and print flat technology
- IP22 protection and easy-clean cover for hospitality environments
- CloudPRNT Next connectivity for fast cloud connected printing
- Simple kiosk integration with efficient front opening with near end sensor for kiosk and self-service
- Reduced packaging and paper-saving features
